

The United States at Night

This is a composite satellite photo showing irresponsible lights shining upwards causing problems for astronomers, wildlife, plant life, safety, and human health. This wasted light is estimated to consume over **\$5 Million** of electricity every night. Let's **"Go Green"** and do something about it!!!

Hawaii

**Can You Find
Your Hometown?**

For more information about
"Responsible Lighting" and
the effects on Wildlife, see our
"Wreaking Havoc" Presentation
